

EJPB Vol 9(3) 2018

Contents

S.No	Title of the articles	Page number
1.	Genetic architecture studies of yield and its components in castor	790-796
2.	Spectrum of genetic variation in different selection schemes of desi chickpea (<i>Cicer arietinum</i> L.)	797-800
3.	Analysis of induced genetic variability for morphological and floral characters with male sterility in sesame (<i>Sesamum indicum</i> L.)	801-807
4.	Evaluation of Near Isogenic Lines (NILs) of rice for major abiotic stresses of coastal areas	808-814
5.	Heterosis, combining ability and gene action studies for insect-pest and disease resistance in cucumber	815-828
6.	Genotype x Environment Interaction of yield traits under low temperature stress adopting different planting dates in rice (<i>O. sativa</i> L.)	829-838
7.	Identification of molecular marker linked to mungbean yellow mosaic virus (MYMV) resistance in <i>Vigna radiata</i> (L.) Wilczek	839-845
8.	Comparative performance of parametric and non-parametric measures for analyzing G x E interactions of grain yield for dual Purpose Barley genotypes	846-855
9.	Studies on yield, root characters related to drought tolerance and their association in upland rice genotypes	856-862
10.	High yielding wheat lines carrying superior grain and processing quality introgressed from tall traditional cultivars	863-872
11.	Character association for fruit yield and yield traits in <i>Salacia chinensis</i> L.: A threatened medicinal plant	873-878
12.	Morpho-physiological studies on moisture deficit stress tolerance in F _{2,3} population of muskmelon (<i>Cucumis melo</i> L.)	879-893
13.	Gamma ray induced genetic improvement of sorghum landraces for grain yield and charcoal rot tolerance	894-898
14.	Study of combining ability for yield and its contributing traits in bread wheat [<i>Triticum aestivum</i> (L.)]	899-907
15.	Combining ability analysis and gene action studies in pearl millet [<i>Pennisetum glaucum</i> (L.) R Br.]	908-915
16.	Assessment of genetic variability in newly developed rice (<i>Oryza sativa</i> L.) hybrids	916-925
17.	Graphical analysis for fruit yield and its component traits in chilli (<i>Capsicum annuum</i> L.)	926-932
18.	Phylogenetic studies on Assam rice (<i>Oryza sativa</i> L.) accessions for nitrogen use efficiency	933-940
19.	Combining ability studies for grain yield and its component traits in cowpea (<i>Vigna unguiculata</i> (L.) Walp)	941-947
20.	Genetic variability studies for stay green and different yield attributing traits in Sorghum	948-955
21.	Determination of radio sensitivity of jasmine (<i>Jasminum</i> spp.) to	956-965

	gamma rays	
22.	Genetic variability and association studies in half-sib progenies of Puvarasu (<i>Thespesia populnea</i> L. Sol. ex. Correa) in coastal regions of Thiruvarur District, Tamil Nadu	966-971
23.	Estimation of heterosis for tender nut yield traits in coconut hybrids (<i>Cocos nucifera</i> L.)	972-977
24.	Marker-assisted selection of bacterial blight broad spectrum resistance genes <i>Xa33</i> and <i>Xa38</i> into CO43 in ICF ₃ generation	978-984
25.	Genetic divergence studies in muskmelon (<i>Cucumis melo</i> L.)	985-992
26.	A protocol for rapid screening of rice lines for seedling stage salinity tolerance	993-1001
27.	Assessment of mutagenic sensitivity in jasmine (<i>Jasminum spp.</i>) to chemical mutagen	1002-1011
28.	Heterosis and combining ability studies for yield and its component traits in Maize (<i>Zea mays</i> L.)	1012-1023
29.	Characterization of rice (<i>Oryza sativa</i>) germplasm accessions for seedling vigor and its related traits	1024-1030
30.	Heterosis and inbreeding depression studies in pumpkin (<i>Cucurbita moschata</i> Duch. ex Poir.)	1031-1037
31.	Genetic variability, heritability and character association studies in sweet corn (<i>Zea mays</i> L. <i>saccharata</i>)	1038-1044
32.	Development of reference set for <i>Fusarium</i> wilt resistance using principal component scores in pigeonpea (<i>Cajanus cajan</i> Millsp L.) germplasm	1045-1052
33.	Genetic variability and correlation studies in upland cotton (<i>Gossypium hirsutum</i> L.)	1053-1059
34.	Studies on variability and genetic components of yield and quality traits in turmeric (<i>Curcuma longa</i> L.)	1060-1066
35.	Genetic studies in F ₂ for biometrical traits in Rice (<i>Oryza sativa</i> L.)	1067-1076
36.	Development of a simple and genotype independent <i>in vitro</i> regeneration system in Sugarcane [<i>Saccharum</i> spp] using shoot apex explants	1077-1082
37.	Inheritance of resistance to rice weevil (<i>Sitophilus oryzae</i> L.) in bread wheat (<i>Triticum aestivum</i> L.)	1083-1093
38.	Genetic variability and correlation studies in greengram (<i>Vigna radiata</i> L. Wilczek)	1094-1099
39.	Studies on morphological characteristics and categorization of nerium accessions based on utility	1100-1106
40.	Performance of bitter gourd genotypes (<i>Momordica charantia</i> var. <i>muricata</i> L.) for higher yield and quality traits under sodic soil condition cultivar mithi pagal	1107-1114
41.	Studies on combining ability and heterosis in rice (<i>Oryza sativa</i> L.)	1115-1121
42.	Molecular diversity analysis of maize (<i>Zea mays</i> L.) inbreds using SSR markers	1122-1129
43.	Validating effect of QTLs and identifying breeder friendly markers for manipulating grain length in local rice (<i>Oryza sativa</i> L.) genotypes	1130-1136

44.	Genetic variability, heritability and genetic advance studies in backcross populations of maize (<i>Zea mays</i> L.)	1137-1145
45.	Morphological and grain quality analysis of basmati rice (<i>Oryza sativa</i> L.) under different systems in north-west plains of Himalaya	1146-1156
46.	Combining ability analysis of indeterminate tomato F ₁ hybrids suitable for polyhouse cultivation	1157-1162
47.	Genetic variability and character association for earliness, yield and its contributing traits in F ₂ population of rice (<i>Oryza sativa</i> L.)	1163-1169
48.	Correlation and path analysis in F ₂ generation of pumpkin (<i>Cucurbita moschata</i> Duch.ex Poir)	1170-1193
49.	Genetic divergence analysis for bacterial leaf blight (BLB) disease resistance in rice (<i>Oryza sativa</i> L.)	1194-1205
50.	Correlation and path analysis studies in hybrids of Line x Tester for yield and yield component traits in sesame (<i>Sesamum indicum</i> L.)	1206-1212
51.	Correlation and path analysis studies in Mithipagal (<i>Momordica charantia</i> L var. <i>muricata</i>)(Willd.)	1213-1220
Research Notes		
52.	Genetic variability analyses for economic traits in sesame (<i>Sesamum indicum</i> L.) germplasm	1221-1225
53.	Cause and effect analysis for yield and grain quality traits in rice (<i>Oryza sativa</i> L.)	1226-1233
54.	Standardization of duration for accelerated ageing in barnyard millet cv. CO2 and MDU 1	1234-1238
55.	Genetic evaluation of <i>Salacia chinensis</i> L. accessions for yield and related traits	1239-1243
56.	Correlation and path analysis in large seeded groundnut genotypes	1244-1246
57.	Genetic variability study in pearl millet germplasm (<i>Pennisetum glaucum</i> (L.) R.Br.) for yield and its component traits	1247-1252
58.	Studies on genetic diversity in rice TGMS lines	1253-1257
59.	Heterosis for important qualitative and quantitative characters of mungbean	1258-1262
60.	Genetic variability and association studies in pearl millet for green fodder yield and quality traits	1263-1271
